SKY ceiling loudspeaker grille: functional and versatile design

This frameless, low-profile grille is designed specifically for SKY 5-inch in-ceiling loudspeakers, such as the SKY-5, SKY-5T, SKY-5-DOME and SKY-5T-DOME models. Made of rust-resistant aluminium, it guarantees long durability and discreet integration into any environment thanks to its black finish (RAL 9005) and the possibility of customisation, as the logo is removable and the surface can be painted.

Strength and adaptability for professional installations

Resistant material: Constructed from liquid painted aluminium, it withstands demanding environments thanks to its EN ISO 9227:2006 certification for resistance to neutral salt spray.

Practical design: Removable and lockable system that facilitates installation and maintenance.

Ideal dimensions: With a diameter of 214 mm and a profile of only 5 mm, it fits perfectly with compatible speakers.

Why choose the SKY grille?

Compatibility guaranteed: Compatible with SKY-5 and SKY-5T models, as well as 'DOME' versions.

Professional finish: Its black colour and frameless design ensure a seamless aesthetic integration.

Flexibility: Easy to customise to suit the decoration and needs of each project.

This grille is the ideal solution for installers and sound engineers looking for a durable, functional and adaptable accessory for in-ceiling sound systems.
