

ATTENUATORE DA INCASSO STEREO PER ALTOPARLANTI DA 4 E 8 OHM 10+10W

Low-impedance stereo
attenuator

Reference: DOT-210ST

Low impedance mono attenuator for recessed or surface mounting. Benefits: FONESTAR's own minimalist design, taking into account the market's needs and ensuring that they will blend in with any installation, whether domestic or professional. Ergonomically designed 6-position potentiometer with an off switch, which allows for easy operation. The transformer attenuator provides better sound quality and volume control accuracy. Thanks to its standard measures, it can be embedded with square and round universal boxes for cardboard and plaster partitions (Pladur). They can also be installed on the surface along with the DOT-BOX surface installation boxes, available in black or white. This whole range is supplied in white, however, for installations requiring black attenuators, the black panel mod. DOT-01N, available separately, is easily interchangeable with the white one. Applications (common to the whole series): PA and voice evacuation systems, large and small shops, shopping centres, hotels, cafeterias, game rooms, household use, etc. Technical data: Stereo attenuator Low Z for speakers 4-8 Ohm 6-position dimmer potentiometer with an off switch Power: 10 W + 10 W Color: White
