

Zone amplifier

Zone amplifier

Reference: MPZ-6480RGU

Zone amplifier with 6 output zones with independent volume control, prerecorded message playback and USB/SD/MP3 recorder/player with digital FM tuner. Possibility to page and prerecorded message playback in zones using paging microphone mod. MZ-648. Single or dual operating mode: in single mode, when paging in one or several zones music playback will be interrupted in the rest of the zones; In the dual mode an external amplifier is required in order to page with no interruption of background music. Suitable for commercial installations with several loudspeaker zones with the need to play prerecorded messages and page in different zones.
